

# SKY LANCER

Not content to do battle from his spaceship, SKY LANCER launches himself into space armed only with a deadly laser lance. As he propels himself through space he first encounters space mines which he must destroy, followed by a trip through a field of missile launchers which become more accurate as the game progresses. He is then faced with the ultimate galactic challenge, a duel to the death with "Ralph" the red clad robot armed with a deadly weapon so heinous it cannot be described in words. Needless to say... not a game for the weak of heart or the player without cat like reflexes!!

SKY LANCER appeals to players of all ages and all levels of expertise.
